Dr. Edward Brush
ABC Middle School
123 Main Street
Bridgewater, MA, 02324

Dear Dr. Brush,

My previous work experience and leadership roles make me an ideal candidate for a science teaching position at ABC Middle School. The STEM field has made great breakthroughs in past years and ABC Middle School gives students the opportunities they deserve. I know that the combination of my experience, education, and motivation to excel and help others will make me a considerable asset to ABC Middle School.

I love learning new things and look forward to building my education. I am currently applying to graduate programs and look forward to obtaining the training I need to become more successful in this position. Science is constantly changing with the discovery of new things and new developments in technology. I am curious and compassionate and have great listening skills so I am open to new ideas and learning new things. I'm always up for a challenge and ready to take on any task.

This job is a great fit for me because it coincides with what I learned in School. I have learned a lot through my education courses as well as all my science courses. My schooling and experiences have provided me with the opportunity to be successful in this position. To have the opportunity to be able to give that same fulfillment and confidence to my students would be extremely rewarding. I truly believe in the idea of a supportive and inclusive environment for all students. I am comfortable working independently and as part of a team. I strongly prioritize critical thinking and creativity that I could encourage with my assignments and lesson plans and take pride in tailoring everything that I create to the unique needs of the classroom.

My experiences with children/adults including teaching, mentoring, and tutoring, combined with the knowledge I have from my science courses have convinced me that being a science teacher at ABC Middle School will suit me well. I have worked various jobs with a variety of different people. From working with younger kids and teaching them to working with peers and those above me and learning from them, each has been a valuable experience in it's own. In working at The Bridge Center , I learned how to adapt to the different abilities of the children and adults. I am sure that I can put this same skill to use for you and continue to improve upon it as I learn from those around me. I will do whatever it takes to help create an environment where every class is special and all your students excel.

I have attached my resume for your consideration. I look forward to speaking with you soon. Should you have any questions you may reach me via phone (###-###-####) or via email (your email).

Thank you for your time and consideration,

Sincerely,
<your name>
