Name:

Project 1 Sprint 1 grading sheet

Code:

Project builds and runs on my machine_____(20)
(builds on linux – but more importantly, no hard coded paths – no c:\blah etc)

gets correct data_____(50)
(including multiple pages)

uses one of the allowed languages_____(20)
(with the supporting files required for that language)

Puts the data in file_____(10)

DevOps:

project name has your name in it_____(10pts)

read me includes correct stuff_____(10pts)

project and all required files on github_____(20pts)
(and uses the correct jetbrains dev tools for your language)

Uses secrets properly so your API key isn't public_____(20pts)

github actions setup to run linters and automated tests_____(20pts)
(and your code passes the tests and linting checks – I test by making a commit/push on your project)

Total_____(180 points)
