

Name:

Project 1 Sprint 1 grading sheet

Code:

Project builds and runs on my machine _____ (20)
(builds on linux – but more importantly, no hard coded paths – no `c:\blah` etc)

gets correct data _____ (30)

uses one of the allowed languages _____ (20)
(with the supporting files required for that language)

Puts the data in file _____ (20)
(in the correct format)

Wufoo form setup and sent to me _____ (30)

DevOps:

project name has your name in it _____ (10pts)

read me includes correct stuff _____ (10pts)

project and all required files on github _____ (20pts)
(and uses the correct jetbrains dev tools for your language)

Uses secrets properly so your API key isn't public _____ (30pts)

github actions setup to run linters _____ (20pts)
(and your code passes the linting checks – I test this by making a commit/push on your project)

Total _____ (210 points)
