

...then click on Settings ... scroll down and click on Clear Browsing Data...
→ I usually clear everything.

...then click on Settings ... click on Privacy, Search and Services... click on Choose What to Clear...
→ I usually clear everything.

...then click on Options... click on Privacy and Security... click on Clear Data...
→ I usually clear everything.

Safari ... unfortunately, I do not use Apple computers, so I don't know the browser well enough to tell you how to clear the browser cache in Safari.
→ If you don't know how, call the BSU IT Help Desk.
